

SJSU Scholars in Science File and Information Release

I hereby apply to be considered for a scholarship from San Jose State University's Scholars in Science Program. I hereby authorize the Scholars in Science Program Director to release my application to the Selection Committee Members, the program evaluation team and the Federal Agencies to whom the Scholars in Science Program must report. I understand that my application file will be viewed by the Selection Committee, which consists of faculty, administrators, and a student from the program.

I also authorize Scholars in Science Program Director to track my progress throughout my education at SJSU and to track my educational degrees through the National Student Clearinghouse.

I understand that one of my responsibilities if selected for an S³ scholarship will be to maintain contact with the Program Director throughout my education, particularly as I continue to towards advanced degrees at other academic institutions. This can be accomplished with a yearly email briefly describing my accomplishments and progress towards advanced degrees. I am also required to fill out a survey once a year for program evaluation purposes.

I grant permission to use photos of me and a brief biography that I supply in the S³ website, in recruitment posters and in brochures to be distributed to other students and to high schools.

Mentor

One of the benefits of the S³ Program is that you will have a mentor in your major. If you already have a faculty mentor in your major or you have an idea of who you would like to serve as your mentor please list the name(s) below. We cannot guarantee that the individual you have selected will agree but we will approach those listed first.

_____ I already have a mentor in my major. It is _____.

_____ Please find me a mentor. Some of the faculty I would consider are _____
